

A Joint Message from Intrahealth Canada and the CDX Team:

Clinical Data eXchange (CDX) is a clinical distribution service developed by Interior Health. Northern Health (NH) and Interior Health (IH) have collaborated to facilitate the sharing of Health Authority clinical information to participating provider EMR systems using this service. Intrahealth Canada has partnered with the CDX Team to deliver these enhanced services, available to Intrahealth Profile EMR users as of Profile version 7.10.110. CDX has advanced the capabilities originally offered through Interior Health’s Physician Office Integration (POI) and Northern Health’s Clinical Information eXchange (CIX) distribution services.

- New content available
- Enhanced security
- Improved representation of clinical information within reports while conforming to provincial data standards

Distribution of Interior Health and Northern health content is listed below:

CIX (NH content)	POI (IH content)	CDX (IH & NH content)	Green indicates new content
	•	•	IH LAB Reports
	•	•	IH Diagnostic Imaging Reports
	•	•	IH Transcribed Reports (Including Royal Inland Emergency Notes)
		•	IH Admission Notifications to primary care providers
		•	IH Discharge Notifications to primary care providers, including a death indicator
•		•	NH LAB Reports
•		• (development underway)	NH Diagnostic Imaging Reports
		•	NH Transcribed Reports
		•	NH Admission Notifications to primary care providers
		•	NH Discharge Notifications to primary care providers, including a death indicator

* All new content will only be made available via CDX. POI and CIX will remain available to users, limited to current content.

Interior Health, Northern Health and Intrahealth Canada are strong supporters of ensuring the advancement of continuity of care between primary, community and acute care healthcare environments, and are paying particular attention to ensure communications with Primary Care Homes is facilitated. In an ongoing effort to improve the CDX service, IH and NH are completing development of new features and are pleased to support alignment of Ministry of Health and provincial strategies that support patient centered care.

Interior Health and Northern Health encourage EMR users to onboard to CDX to take advantage of current new offerings as well as being in the best position to onboard to future enhancements.

To onboard to CDX, users should:

- Ensure they have been upgraded to Profile Version 7.10.110 (or higher)
- Follow this link <https://bccdx.ca/Pages/activationform.aspx> to subscribe to the new service
- If you have questions contact the CDX team at <https://bccdx.ca/Pages/contactus.aspx>
